

## Inspection Assistance

(Food Safety or Agricultural Program Development and Inspection Assistance)

IFSI offers assistance writing, developing, training and auditing new or existing food safety programs. This is a critical asset to a new or beginning grower or processor that needs an essential second or third party inspection by FPA, ABI, ASI, PRIMUS or Silliker and does not possess a quality assurance individual who is familiar with a new third party company or audit program.

IFSI will determine what kind of food safety program you need, which inspection company you desire to use and how soon you need the inspection. It will develop the program in its entirety or just the portions required. IFSI will assess where the program shortfalls are according to the audit company's inspection standards and bring these up to their requirements.

**IFSI will do whatever is necessary to assist the processor or grower getting ready for the inspection and successfully passing it. IFSI has an exceptionally superior track record getting organizations ready and passing all second and third party inspections.**

IFSI can also develop individual programs such as sanitation, maintenance or microbiological to name a few, to meet the needs of the organization, the customer or industry.

IFSI also provides customized programs to assist new QA's, QA positions in transition and the training of QA's.

IFSI also can troubleshoot your food safety program and let you know how it compares with the FDA, USDA or any 2<sup>nd</sup> or 3<sup>rd</sup> party standard. This is a free service to the client – there are no strings attached.

In all of the above scenarios IFSI provides a time and cost letter. IFSI has the most affordable and productive programs in the industry. Our rates are the most reasonable in the entire industry.

**One of our most successful programs is our Chemical and Laboratory Program where through a combination of both or one or the other, the food safety programs mentioned in this section can be without**

**any fees whatsoever. This program is a true asset to the new or beginning processor on a limited budget.**

The following audit company standards are common in the industry that IFSI is able to assist with preparation and successfully passing:

- FPA
- ABI
- ASI
- Primus
- SYSCO Foods
- U.S. Foods
- Marriott Hotels
- USDA and USDA QTV
- FDA
- Scientific Certification Systems or NutraClean
- Many others
